## SALES REPRESENTATIVES AND DISTRIBUTORS

**FM SOLAR, Santa Rosa, CA - Taipei, Taiwan - Osaka, Japan - Berlin, Germany**  
FM Solar offers low volume, special substrate supplies of silicon for startup solar companies, as well as long-term, high quality silicon supply contracts from leading silicon processing companies.

**SOLAR CITY CO., LTD., Taipei, Taiwan**

Located in Taiwan's Hsinchu County, Solar City has installed the latest equipment from Germany and employs local experienced process engineers to offer low cost/high quality ingot growing and substrate slicing. Allow us to quote your short or long term substrate requirements.

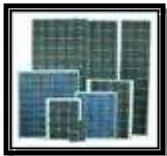

**WAFAB INTERNATIONAL, Livermore, CA**

Wet process tools for solar substrate cleaning, etching and processing. For startup R&D companies Wafab offers several necessary lab tools including: desiccator shelves, glove boxes, custom tanks, chillers, pumps as well as custom-designed wet process systems, fume hoods and laboratory benches. Wafab's Solar Queen product line is a fully automated dry-in/dry-out wet process system for cleaning 600-1200 solar substrates per hour.

**VSERV Technologies, Santa Clara, CA - Tamil Nadu, India**

Founded by former AMAT engineers who are experienced precision tool builders, VSeRV offers next-generation, high-volume solar cell processing and assembly equipment. The VSeRV product line would be applicable for solar startups as well as mature solar companies who need cost-effective tool sets and engineering support for solar panel assembly operations.

**NEWCORE TEK, CO., LTD. Taipei, Taiwan**

The oldest and most experienced solar assembler contractor in Taiwan, is NewCore Tek Company in Taipei City. NewCore Tek is the outsource selection for many leading solar companies, offering complete processing and assembly services. Solar startups as well as mature solar companies will find their assembly services ideal for their outsource contract assembly requirements.

**HONDA ELECTRONICS, CO., LTD. Toyohashi, Japan**

Honda Electronics offers a full line of microelectronics cleaning and surface conditioning equipment. Products offered include: megasonic and ultrasonic generators and transducers, nozzle sprayers, benchtop or drop-in tanks, atomizers and 500+ other products.

**IN USA Norwood, MA**

IN USA, Inc. manufactures ozone generators as well as a variety of ozone instruments to measure ozone in both gas and liquid phases from ppb levels to concentrations as high as 900 g/m<sup>3</sup>. Ozone may be used as a "green" replacement oxidizer for a variety cleaning applications in the microelectronics industry.
